

Cybersecurity Baseline Risk and Control Assessment

As Certified Public Accountants and Advisors, BRC has developed a cybersecurity practice that helps clients **identify, evaluate, measure, and manage** cybersecurity risks. As potentially damaging cyberattacks continue to affect more organizations, and as news about cybersecurity, hacking, ransomware, and data breaches increases, you may have found yourself wondering about your organization's susceptibility.

BRC can help you gain confidence about your organization's cybersecurity posture, and help you make well-informed decisions about how best to address your security risks and get the most protection for your critical data.

BRC has created a multi-faceted, risk-based, scalable approach to your cybersecurity concerns.

Cybersecurity Baseline Risk & Control Assessment Services

- Gain an understanding of the current IT environment and the critical data to scope assessment
- Review the current IT policies, procedures, and practices
- Review the current IT controls and correlate them with an Industry control framework such as the CIS Controls from the Center for Internet Security or the National Institute of Standards and Technology (NIST) Cybersecurity control framework
- Review the current system configurations with the CIS Benchmark Configuration Standards
- Prepare a comprehensive report of recommended actions that will increase the cybersecurity maturity and meet the cybersecurity industry best practices. Actions the organization is already performing well are also acknowledged

Let's get started today. For more information please contact: Ben Hunter III, CPA/CITP, CISA, CRISC, CDPSE, CISM at (336).294.4494 (bhunter@brccpa.com) or any of our dedicated service line leaders.
